

ISee TL (TimeLine)

A New Form of “Information Accessibility*” for Sports & Live Events

— Your single post can empower someone else. Let’s share the excitement together —

*Information accessibility = a system that ensures everyone can obtain the information they need

< Have you ever experienced something like this?

I can’t figure out the highlights of the event…

I’d love some tips on the best way to enjoy it!

I want to chat and have fun with other participants!

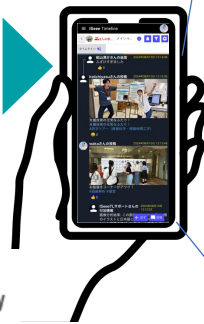

The ISee Project at Tsukuba University of Technology has developed a system called “ISeeTL (TimeLine)” so that everyone can enjoy events **together**. With just a smartphone, you can post and share what you **see**, **hear**, and **feel** about the event, building a shared timeline that lets **DHH**, **BLV**, and **all individuals** experience the event together.

ISee TL in Action

< We answer your questions

What is ISee TL (TimeLine)?

- A tool that lets you post and share what you see, hear, and feel—right from your phone! 📱
- Co-create live info that enhances everyone’s experience. 🤝
- Perfect for sports games, exhibitions, festivals, and many other events! 🎉

What do I need to do?

- Just **reading** the posts helps—you’re sure to find something useful! 👁️
- Tap “**Post**” or “**Flow**” to ask questions, share impressions, or add what you know. ✍️
- Filter with **tags**, or use the built-in AI for translation and image descriptions. 🤖

How is it different from major social networks?

- Each event has its own dedicated “**room**,” so you can post worry-free. 🏠
- No account needed—you can even post **anonymously** right in your browser! 🔒
- No need to refresh; new info streams in automatically. 🔄

So, what is the ISee Project?

- An open initiative building information accessibility where **anyone can help anyone**. 🤝
- Creating spaces where everyone can enjoy events **together**, regardless of disability. 🌍
- We’d love your feedback—please take our **1-minute survey** via the QR code! 📝

ISee for Expo 2025

Tsukuba University of Technology is the only national university in Japan specifically for people who are deaf or hard of hearing, and for people who are blind or low vision.

Tsukuba University of Technology was established in 1987 as the only national university in Japan dedicated to people who are deaf or hard of hearing, and for people who are blind or low vision.

Here, students learn as equals in an environment where mutual support arises naturally. They engage in direct communication with one another, learning independently without relying on intermediaries.

With a strong emphasis on small-group education, the university provides tailored support based on each student's individual needs and developmental stage. Through hands-on learning, students gain the skills they need to thrive in society.

In April 2025, the university will launch a new Faculty of Symbiotic Society Design, aiming to create a society where diverse individuals can shine together.

- ☐ Faculty of Industrial Technology
- ☐ Faculty of Health Sciences
- ☐ Faculty of Diversity and Inclusion Studies
- ☐ Graduate School of Technology and Science

Opened in April 2025
